EDUCATION & ACHIEVEMENTS

Bennett University

B. Tech in Computer Science Engineering

Uttar Pradesh, India

2022 – 2026

EXPERIENCE

Freelance Web Developer

Aug 2025 – Sep 2025

[Srajan Vastu \(Remote\)](#)

- Launched an SEO-integrated React.js website with 10+ responsive pages, increasing inquiries by 20% and session duration by 25%.
- Achieved a 95+ Google Lighthouse score by collaborating with the client to optimize mobile and desktop performance and accessibility.

Web Development Intern

Jan 2025 – Apr 2025

Medoc Health IT Pvt Ltd (Remote)

- Built a React.js analytics dashboard that accelerated reporting by 35% and empowered 5+ client teams with faster insights.
- Refactored Node.js + MongoDB backend APIs, cutting latency by 40%, reducing server costs by 15%.

PROJECTS AND RESEARCH PAPER

[Serverless Document Chat App](#) | *AWS Bedrock, LangChain, Pinecone, DynamoDB, Lambda, Cognito* Jul 2025

- Developed a serverless PDF chat application that processed 100+ documents and enabled real-time natural language Q&A with >90% query accuracy.
- Designed and deployed AWS Lambda + Bedrock architecture, cutting infrastructure costs by 25% compared to traditional hosting.

[Lost & Found – Smart Matching Platform](#) | *Node.js, SQL, SuperBase, Heroku, AWS S3, OpenAI* Jul 2024

- Developed a lost & found web app with AI image matching and Azure Blob Storage, managing 200+ reports and 1GB+ of media without data loss.
- Secured user data via JWT role-based authentication, ensuring 100% safe access control for admins and users during beta testing.

[BBS Web Server – Barebones HTTP Server](#) | *C++, Winsock2, TCP/IP, Visual Studio*

Jan 2023

- Engineered a C++ HTTP/1.1 server using Winsock2 and non-blocking I/O, managing 50+ concurrent connections with reliable payload delivery
- Built a robust TCP listener with automated request parsing that passed 200 unit tests for accurate status codes, headers, and static content serving.

[Research Publication \(IEEE\)](#) |

- Co-authored “Evaluating the Adversarial Stability of Classical Fake News Classifiers Using Transformer Embeddings”, accepted at the 2025 ICAFT International Conference (Paper ID: ICAFT2026-394).

ACHIEVEMENTS

- Hackathons: Smart India Hackathon (SIH) semi-finalist
- 10+ Projects made for clients as a freelancer
- 200+ DSA Questions across multiple platforms

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, SQL, HTML/CSS, Motoko

Frontend: React.js, Tailwind CSS, EJS

Backend: Node.js, Express.js, REST APIs, Middleware, MVC, LangChain, Pinecone, TensorFlow, NumPy, Pandas,

Databases: PostgreSQL, MongoDB, DynamoDB, SuperBase, ICP Canisters

Cloud / Serverless: AWS (Lambda, Bedrock, S3, Cognito), Azure Blob Storage, Heroku

Developer Tools: Git, GitHub, VS Code, Postman, DFINITY SDK, Docker

Testing: Jest (Unit/Integration)
