EDUCATION

Bennett University

B. Tech in Computer Science Engineering

Uttar Pradesh, India

2022 – 2026

EXPERIENCE

Electronic Arts Software Engineering virtual experience program

Feb 2026

- Proposed a new feature for the EA Sports College Football and wrote a Feature Proposal describing it to other stakeholders
- Patched a bugfix and optimized the EA Sports College Football codebase by implementing an improved data structure.

Rocket. Chat (Open-Source Contribution)

Dec 2025

- Engineered full stack "Smart Reminder Bot" using JavaScript and Rocket. Chat Apps Engine, implementing UI Kit Modals, MongoDB persistence, and a background job scheduler for asynchronous task automation.
- Refactored core backend logic to resolve user-counting discrepancies (PR #38028), ensuring scalable and accurate data handling within the main open-source platform.

Full Stack Intern | Medoc Health IT Pvt Ltd (Remote)

Jan 2025 – Apr 2025

- Built a React.js analytics dashboard that accelerated reporting by 35% and empowered 5+ client teams with faster insights (worked with a team of 5 members)
- Refactored Node.js + MongoDB backend APIs, cutting latency by 40%, reducing server costs by 15%.

PROJECTS AND RESEARCH PAPER

[Serverless Document Chat App](#) | AWS Bedrock, Lang Chain, Pinecone, DynamoDB, Lambda, Cognito

Jul 2025

- Developed a serverless PDF chat application that processed 100+ documents and enabled real-time natural language Q&A with >90% query accuracy.
- Designed and deployed AWS Lambda + Bedrock architecture, cutting infrastructure costs by 25% compared to traditional hosting.

[Lost & Found – Smart Matching Platform](#) | Node.js, SQL, Supa Base, Heroku, AWS S3, OpenAI

Jul 2024

- Deployed a lost & found web app with AI image matching and Azure Blob Storage, managing 200+ reports and 1GB+ of media without data loss.
- Secured user data via JWT role-based authentication, ensuring 100% safe access control for admins and users during beta testing.

[BBS Web Server – Barebones HTTP Server](#) | C++, Winsock2, TCP/IP, Visual Studio

Jan 2023

- Engineered a C++ HTTP/1.1 server using Winsock2 and non-blocking I/O, managing 50+ concurrent connections with reliable payload delivery
- Made a robust TCP listener with automated request parsing that passed 200-unit tests for accurate status codes, headers, and static content serving.

[Research Publication \(IEEE\)](#) |

- Co-authored "Evaluating the Adversarial Stability of Classical Fake News Classifiers Using Transformer Embeddings"
- Accepted at the 2025 ICAFT International Conference (Paper ID: ICAFT2026-394).

ACHIEVEMENTS

- DSA:** Solved 300+ problems, 1850 Leet Code rating.
- Open-Source Contributor (Rocket. Chat):** Contributed production code to a distributed system with global code reviews.
- Smart India Hackathon (SIH) Semi-Finalist:** Coded and pitched a scalable solution under ambiguous, time-bound conditions.
- Freelance Web-Developer:** Delivered 2 client projects end-to-end with ownership of design and deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, C++, SQL, TypeScript

Frontend: React.js, Tailwind CSS, EJS, HTML/CSS

Backend: Node.js, Express.js, REST APIs, Middleware, MVC, Lang Chain, Pinecone, Kubernetes, Kafka

Computer Science: Data Structures, Algorithm Design, OOP

Databases: PostgreSQL, MongoDB, DynamoDB, Supa Base

Cloud / Serverless: AWS (Lambda, Bedrock, S3, Cognito etc.), Azure Blob Storage, Heroku

Developer Tools: Git, GitHub, VS Code, Postman, Docker, Debugging

Testing: Jest (Unit/Integration)
